MICR Verifier

MICR Verifiers

To ensure your checks comply with the standards of a bank, it is important to maintain an in-house quality assurance program. Many check printers, equipment vendors and fortune 500 companies around the world use RDM's MICR Verifier™ and Verifier MH™ to monitor and detect problems associated with the MICR line.

Banks, forced to process inferior MICR documents are tightening up their standards and are implementing tougher penalties for reject items. Banks may charge corporate customers anywhere from $0.50 to $6.00 per item for repairing and processing poor quality MICR documents.

When MICR printing errors are not identified and corrected early, entire check runs may need to be reprinted. This results in wasted time, materials and money. When checks are tested regularly using the MICR Verifier and Verifier MH, errors in the MICR line can be detected and corrected before it becomes a problem.

Ensure that you have the most technically advanced MICR testing equipment available. Don't leave yourself exposed to the expense and embarrassment associated with substandard MICR documents. The RDM MICR Verifier and Verifier MH is a key tool in your MICR quality control program.

MICR Verifier

■ Tests for signal level strength, format, extraneous MICR ink, character spacing, dimension and format errors.

■ Ideal tester for many environments including:
- Corporate check printing data centers
- Check/Security Printers
- Laser Printer Vendors
- Field Service Organizations

■ With this affordable, easy to use tester, you can easily monitor the print quality of your own MICR documents.

MICR Verifier MH

■ Minimize Waste

■ Designed specifically for commercial check printers and organizations that print the MICR line at varying locations on an 8 ½" X 11" sheet

■ Eliminates the need to print sample test checks.

■ The read head can be adjusted to read the MICR line anywhere on the 8 ½" X 11 sheet.

The RDM **MICR Verifier™** is a portable tester that combines simple, one-touch operation with sophisticated built-in analysis software. It has become an industry leader due to its durability and operational simplicity.

RDM **MICR Verifier MH™** provides all the unique functions of the MICR Verifier with an added benefit. The MICR Verifier MH is revolutionizing the check printing industry with a moveable read head that eliminates bursting 8 ½" X 11 cut sheets in turn saving the company money on wasted materials.

RDM Corporation

Verifier and Verifier MH

Features and Benefits

Menu driven start-up screen

Very user friendly, minimal training required

Large back-lit display

Operators can quickly identify problems

Simple one touch operation

Check can be scanned quickly saving time

User programmable signal alarm levels

Allows user to monitor MICR quality to standards higher than banks

Ensures that only the highest quality MICR documents are produced

Supports multiple format specifications

Can be used to test MICR documents worldwide

Extraneous ink detection

Ensures that no extraneous toner will compromise readability at the bank

User adjustable read head - *Verifier MH only*

MICR line can be tested at variable locations on the sheet

Eliminates bursting sheets of checks

Reduces costs and saves time

Screen Analysis

Dimension error screen

Operators appreciate the ease and speed of operation, allowing them to constantly monitor quality and call for service.
Other screens include: main menu, test signal level, spacing errors, bar chart, extraneous ink characters, field analysis and actual signal level.

Specifications	
MICR Fonts	E13B or CMC7
Screen	Size - 9" x 1.75" (23cm x 4.5cm) Displays 80 columns by 12 rows Adjustable screen contrast
Printer Support	IBM Proprinter or compatible dot matrix printer
Read Head	Verifier - Scans the entire 5/8" MICR clear band Verifier MH - Adjustable read head for analysis on 8 1/2" x 11" sheets
Dimensions	Verifier - 12" x 13" x 8" (28.8cm x 31.2cm x 19.2cm) Verifier MH - 15" x 24" x 12" (36cm x 57.6cm x 28.8cm)

Quality Assurance Solutions

More than ever before printers, corporations and banks are finding that print quality assurance is having an incredible impact on their daily business. RDM provides products, software and training to assist any organization with the implementation of a successful quality assurance program.
